

TripWiz — Folder 07: End-User Manual

Team: TripWiz — Ariel University · David Kitinberg, Amit Bitton, Sagi Hassid

How to read this manual

This manual is for **TripWiz travelers** — everyday users who plan trips, build itineraries, collaborate with travel partners, and manage their travel documents.

Looking for the Admin Manual? Portal administrators who moderate users, oversee trips, and curate trending-destination content should refer to [08.md](#) (Folder 08 — Admin Portal Manual), a completely separate, dedicated document covering the in-app Admin Portal.

Every section is written as a numbered, step-by-step walkthrough so that any user — regardless of technical background — can follow along and operate the system successfully. Wherever a screen, modal, or panel appears in the workflow, a placeholder of the form [INSERT SCREENSHOT: ...] marks exactly where to capture and paste a screenshot from the live UI before this manual is finalized for submission.

This manual covers everything a regular TripWiz user — whether planning solo or with travel partners — needs to know to use the system from first sign-up to final export.

1. Getting Started

1.1 Creating an Account

1. Open TripWiz in your browser and click **Sign Up** on the login screen.
2. Enter your **email address**, choose a **password**, and fill in your basic profile details (first name, last name).
3. Click **Create Account**. TripWiz uses Amazon Cognito to securely register your credentials — your password is never stored or transmitted in plain text (the app uses Secure Remote Password (SRP) authentication).

5. Enter the code on the confirmation screen and click **Confirm**.
6. Once confirmed, you'll be redirected to the sign-in page with a success message.

1.2 Signing In

1. On the login screen, enter your **email** and **password**.
2. Click **Sign In**.

Sign In

New to TripWiz? [Create account](#)

3. If your credentials are correct, you'll be taken directly to your **Trips Dashboard**.
4. If you forget your password or your account session expires, simply sign in again — TripWiz securely stores your session token and will keep you signed in across visits until you explicitly sign out.

Tip: All pages in TripWiz other than the login and sign-up screens require you to be signed in. If you try to access a trip link while signed out, you'll be redirected to the login page first.

1.3 Managing Your Account Settings

1. Click your **profile icon / name** in the top navigation bar and select **Account Settings**.

Account Settings

Profile Details
Your name and photo visible to collaborators

Profile photo
Click to upload · JPG, PNG, WebP · Max 5 MB

FIRST NAME
Your first name

LAST NAME
Your last name

EMAIL ADDRESS
amitbitton50mail@gmail.com

Email is managed by your Cognito account and cannot be changed here.

 **Save Profile**

2. From this page you can:

- **Edit your profile** — update your first name, last name, and other personal details, then click **Save Profile**.
- **Set your travel preferences** — choose your preferred currency, units (metric/imperial), and travel style, then click **Save Preferences**.
- **Toggle notification settings** — turn **trip reminder emails** and **weather alert emails** on or off using the switch controls. Changes are saved immediately.
- **Delete your account** — scroll to the bottom of the page and click **Delete Account**. You will be asked to confirm this action because it is **permanent and cannot be undone**: all your trips, attachments, and collaborator invitations will be removed.

2. Managing Your Trips

2.1 The Trips Dashboard

1. After signing in, you land on your **Trips Dashboard** — a gallery of all the trips you own or have been invited to collaborate on.

2. Each trip is shown as a card with a cover image (automatically fetched based on the destination), title, and date range.
3. Use the **search bar** at the top to filter your trips by name or destination.

2.2 Creating a New Trip

1. Click the **+ New Trip** button on the dashboard.

2. Enter a **trip title**, **start date**, and **end date**.
3. Optionally, drag-and-drop or browse to upload a **cover image** for your trip — or leave it blank and TripWiz will automatically fetch a relevant destination photo.
4. Click **Create**. You'll be taken directly into the new trip's **Itinerary Builder** (see Section 3) to begin planning.

2.3 Renaming or Deleting a Trip

1. From the dashboard, click the **options** icon on a trip card.
2. Select **Rename** to open a dialog where you can type a new title and click **Save**.
3. Select **Delete** to remove the trip. You'll be asked to confirm — deleted trips are moved to a recoverable "trash" state internally, but are no longer visible to you or your collaborators.

2.4 Discovering Trending Destinations

1. Scroll down on the Trips Dashboard to the **Trending Destinations** section.

2. Browse curated destination suggestions (maintained by TripWiz administrators — see [08.md](#), Section 5) for inspiration on where to plan your next trip.

3. Building Your Itinerary

This is the heart of TripWiz — the visual itinerary builder where you assemble your day-by-day travel plan.

3.1 The Itinerary Builder Layout

1. Open any trip from your dashboard to land on the **Trip Page**.

2. The page is split into:

- A **day-by-day itinerary list** on the left/center, where stops are grouped and ordered by date and time.
- An **interactive map** on the right, showing each stop as a pin and the calculated route connecting them.

3.2 Searching For and Adding a Stop

1. Click **+ Add Stop** within any day section.
2. Type the name of a place — a restaurant, hotel, attraction, airport, etc. — into the search box. TripWiz queries a live places database and shows matching results with addresses and map previews.

3. Click the desired result from the list.
4. Confirm or adjust the **date**, **start time**, and **estimated duration** for the stop, then click **Add to Itinerary**.
5. The stop now appears as a card in your day list and as a pin on the map.

3.3 Editing, Reordering, and Removing Stops

1. Each stop is shown as a **Stop Card** containing its name, time, location, and notes.

2. Click the **pencil/edit icon** on a stop card to change its title, time, duration, or notes. Click **Save** to apply your changes.
3. **Drag and drop** stop cards to reorder them within a day or move them between days — the itinerary, route, and map update automatically.
4. Click the **trash/remove icon** on a stop card to delete it from the itinerary. You may be asked to confirm.

3.4 Viewing Your Route on the Map

1. The map view automatically draws a **road-following route** connecting your stops in chronological order, calculated via Amazon Location Service.

2. Click on any pin to see a popup with that stop's details.
3. The map updates live as you add, remove, or reorder stops.

3.5 Using AI Route Optimization

1. Click the ✨ **Optimize with AI** button near the itinerary header.

2. TripWiz sends your current itinerary to an AI assistant (powered by Claude), which analyzes stop locations, timing, and travel distances, then suggests an improved order or schedule to minimize backtracking and wasted time.
3. Review the AI's suggested itinerary, shown side-by-side with your current plan (including a brief written explanation of what changed and why).
4. Click **Apply Suggestion** to adopt the AI's proposed order, or **Dismiss** to keep your current plan unchanged.

Tip: You can run the optimizer multiple times as you add or change stops — it's designed for iterative refinement, not a one-shot "final answer."

4. Weather Validation & Smart Fallbacks

TripWiz checks your itinerary against real weather forecasts so you're never caught off guard by rain on a beach day or snow on a hiking trip.

4.1 Running a Weather Validation

1. From the Trip Page, click the **Validate Weather** button.
2. TripWiz checks the forecast (up to 16 days ahead) for each stop's date, time, and location, and assesses whether the conditions are suitable for that type of activity (e.g., outdoor sightseeing vs. a museum visit vs. a ski trip).

Check Weather

3. Any stop with a potential weather concern is flagged with an **alert badge** showing the predicted condition (e.g., "Heavy rain expected — 80% chance") directly on its stop card.
4. Validation also runs **automatically** in the background as your trip date approaches, and you'll be notified by email if new alerts appear (see Section 7).

4.2 Reviewing and Acting on Fallback Suggestions

1. Click on a flagged stop's **alert badge** to expand its details.

Check Weather

2. TripWiz suggests one or more **fallback alternatives** — for example, an indoor attraction near the same location if the original outdoor activity looks rained out.
 3. Click **Replace Stop** to swap in the suggested fallback (your itinerary, map, and route update immediately), or **Keep Original** to dismiss the suggestion and keep your plan as-is.
-

5. Collaborating with Others

Plan trips together in real time with friends, family, or travel partners.

5.1 Inviting Collaborators

1. From the Trip Page, click the **Share** button (top-right).

The screenshot shows a dark-themed modal window titled "Share 'germany'" with a close button (X) in the top right corner. The modal is divided into three sections:

- INVITE BY EMAIL:** Contains a text input field with the placeholder "name@example.com" and a blue "Invite" button. Below the input field, a note states: "User must already have a TripWiz account."
- PEOPLE WITH ACCESS (1):** Displays a list of collaborators. The first entry is "You" with a yellow star icon and the role "Owner".
- OR SHARE LINK:** Contains a text input field with a long URL "http://localhost:5173/trips/t-mpthekwy-gk98m" and a blue "Copy" button. Below the input field, a note states: "Anyone with the link still needs an invite to view or edit."

2. Enter the **email address** of the person you want to invite.
3. Choose their **role**:
 - **Editor** — can add, edit, reorder, and remove stops, and run validations/AI optimization.
 - **Viewer** — can see the itinerary and map but cannot make changes.
4. Click **Send Invite**. The invitee receives an email notification with a link to the trip.

5.2 Managing Collaborators

1. Open the **Share** modal again to see the **list of current collaborators** and their roles.

2. As the trip **owner**, you can click **Remove** next to any collaborator's name to revoke their access at any time. 3. Click **Copy Link** to copy a shareable trip URL to your clipboard — useful for sending the trip outside of email invitations (the recipient will still need an account and an active invitation to view or edit).

5.3 Live Co-Editing in Real Time

1. When you and a collaborator have the same trip open simultaneously, TripWiz establishes a **live connection** between your sessions.

2. You'll see a small **presence indicator** (showing who else is currently viewing or editing the trip) and a **"connected" status badge**.
3. Any change one collaborator makes — adding a stop, editing a time, reordering the itinerary — appears **instantly** on every other connected collaborator's screen, without needing to refresh the page.

4. If two people try to edit conflicting information at the same moment, TripWiz safely resolves the conflict and notifies the user whose change could not be applied, so no one's edits are silently lost.

6. Trip Overview & Logistics

Beyond the day-by-day itinerary, TripWiz gives you one place to manage every other aspect of your trip — flights, lodging, packing, documents, and exports.

6.1 Opening the Trip Overview

1. From the Trip Page, click **Trip Overview** in the navigation tabs.
2. This page consolidates all of your trip's logistics into organized sections, described below.

6.2 Managing Flights

1. In the **Flights** section, click + **Add Flight**.

The screenshot shows a mobile app interface for adding a flight. The form is titled "Flight details" and has a subtitle "Keep the essentials in one place — route, timing, airline, and status." It is divided into two main sections: "DEPARTURE" and "ARRIVAL". Each section has a text input field for "AIRPORT" with the placeholder "Airport or country". Below each airport field are three smaller input fields for "TIME", "TERMINAL", and "GATE". At the bottom of the form, there are two more input fields: "DATE" with a placeholder "dd/mm/yyyy" and "AIRLINE". At the very bottom, there are two buttons: "Cancel" and "Save Flight".

2. Start typing an airline or flight number — TripWiz suggests matches from a database of thousands of airports and routes.
3. Fill in departure/arrival airports, dates, and times, then click **Save Flight**.
4. Saved flights appear as cards with all key details (terminal, gate if known, duration) and are also reflected on your day-by-day itinerary automatically.

6.3 Managing Accommodations

1. In the **Stays** section, click + **Add Accommodation**.

Save stay

2. Enter the hotel/rental name, address, check-in/check-out dates, and any booking reference, then click **Save**.
3. TripWiz automatically derives suggested accommodation entries from hotel-type stops already in your itinerary — review and confirm these suggestions or add your own.

6.4 Managing Rental Cars

1. In the **Rental Car** section, click + **Add Rental Car**.

A dark-themed mobile application form titled "Rental car details" with a close button (X) in the top right corner. Below the title is a subtitle: "Keep pickup, return, and confirmation details in one place." The form contains several input fields: "RENTAL COMPANY", "PICKUP LOCATION", "PICKUP DATE" (with a calendar icon and "dd/mm/yyyy" placeholder), "PICKUP TIME" (with a clock icon and "--:--" placeholder), "RETURN LOCATION", "RETURN DATE" (with a calendar icon and "dd/mm/yyyy" placeholder), "RETURN TIME" (with a clock icon and "--:--" placeholder), "CAR TYPE", "CONFIRMATION NUMBER", and "PRICE". At the bottom right, there are two buttons: "Cancel" and "Save rental car". A vertical scrollbar is visible on the right side of the form.

📅 dd/mm/yyyy ⌚ --:--

CAR TYPE **CONFIRMATION NUMBER**

PRICE

Cancel Save rental car

2. Enter the rental company, pickup/drop-off locations and times, and confirmation number, then click **Save**.

6.5 Notes and Packing Lists

1. Use the **General Notes** box to jot down trip-wide reminders (visa requirements, emergency contacts, budget notes, etc.) — your text is saved automatically as you type.
2. Each stop also has its own **note field**, accessible from its Stop Card, for location-specific reminders.
3. In the **Packing List** section, click + **Add Category** (e.g., "Clothing", "Electronics") and then + **Add Item** within each category.

4. Check items off as you pack — your progress is saved automatically.

6.6 Uploading and Managing Document Attachments

1. In the **Documents** section, click **Upload File**.

2. Select a file from your device (e.g., a flight ticket PDF, hotel voucher, or attraction pass image). TripWiz securely uploads it to encrypted cloud storage.
3. Once uploaded, the document appears in your attachments list with its name, size, and upload date.
4. Click **Download** on any attachment to retrieve it, or the **trash icon** to delete it permanently.

6.7 Exporting Your Trip

1. Click the **Export** button at the top of the Trip Overview page.

2. Choose your preferred format:

- **Export as PDF** — generates a polished, printable itinerary document including your day-by-day plan, flights, stays, and notes.
- **Export as Excel** — generates a structured spreadsheet of your itinerary and logistics, useful for further editing or sharing with non-TripWiz users.

3. The file downloads directly to your device.

7. Staying Informed — Notifications

TripWiz proactively keeps you informed about your upcoming trips via email (you can control these from **Account Settings**, see Section 1.3).

7.1 Trip Reminder Emails

1. If you have **trip reminders enabled**, TripWiz automatically emails you a beautifully formatted summary a couple of days before any trip begins — including your itinerary highlights and any active weather alerts.

2. Click **Open My Trip** in the email to jump straight back into TripWiz.

7.2 Weather Alert Emails

1. If TripWiz detects a significant weather concern for an upcoming stop (see Section 4), and you have **weather alerts enabled**, you'll receive an email notification describing the concern and which stop it affects.

TRIPWIZ WEATHER ALERT
