

TripWiz — Folder 08: Admin Portal Manual

Team: TripWiz — Ariel University · David Kitinberg, Amit Bitton, Sagi Hassid

How to read this manual

This manual is for **TripWiz portal administrators** — a small group of trusted users responsible for moderating the platform, supporting end-users, and curating content through the **in-app Admin Portal**. Admin access is granted via a Cognito user-group membership (and an initial email whitelist for bootstrap purposes), and using the Admin Portal is **completely separate** from the regular traveler experience documented in [07.md](#) (Folder 07 — End-User Manual).

Every section below is written as a numbered, step-by-step walkthrough so that any authorized administrator — regardless of technical background — can follow along and operate the portal successfully. Wherever a screen, modal, or panel appears in the workflow, a screenshot from the live UI is embedded directly below the relevant step.

1. Accessing the Admin Portal

1. Navigate to the dedicated **Admin Login** page (a separate URL from the regular traveler login).

[← Back to TripWiz](#)

TripWiz Admin

Restricted area — authorized personnel only.

Need an admin account? [Contact the platform owner.](#)

2. Sign in with your administrator credentials (the same Cognito account used for your regular TripWiz access, provided your account has been granted admin privileges).
3. TripWiz checks your account against the **Admins group** in Cognito (or the bootstrap email whitelist). If you are authorized, you're taken to the **Admin Dashboard**.
4. If your account is **not** authorized for admin access, you'll see an **Unauthorized** screen explaining that you do not have the required permissions.

[Need an admin account? Contact the platform owner.](#)

Security note: All admin actions are performed through dedicated, protected backend routes that independently verify your admin status on every request — admin privileges cannot be spoofed from the browser.

2. Dashboard & Metrics

1. The **Admin Overview** page is your landing page after logging in.

- Here you can see at-a-glance **platform metrics**, such as the total number of registered users, active trips, and recent platform activity — useful for monitoring the health and growth of TripWiz.

3. Managing Users

- Click **Users** in the admin navigation to open the **user management table**.

The screenshot shows the TripWiz Admin Console User Management page. It features a dark theme with a sidebar on the left containing navigation links: Overview, User Management, Trip Moderation, and Platform Settings. The main content area is titled 'User Management' and includes a table of registered users.

USER ID	EMAIL	REGISTERED	TRIPS	STATUS	ROLE	ACTIONS
9485942L	ari@universitymail@gmail.com	7/20/26 1P3	0	Active	Admin	
9485945L	emil@eset@gmail.com	1/20/26 1P3	0	Active	User	
9485947L	tedule27@gmail.com	18/20/26 1P3	0	Active	User	
9485948L	ari@tutor50mail@gmail.com	18/20/26 1P3	5	Active	Admin	
2168946L	david@tinburg@gmail.com	17/20/26 1P3	5	Active	Admin	

- The table lists every registered user along with their email, registration date, account status, and role.
- Use the **search/filter bar** to locate a specific user.
- For any user, you can:
 - Suspend** — temporarily disables the account; the user cannot sign in until reinstated. Click **Suspend**, confirm the action.
 - Unsuspend** — restores a suspended account. Click **Unsuspend** on a suspended user's row.
 - Promote to Admin** — grants the user administrator privileges by adding them to the Cognito Admins group. Click **Promote**, confirm the action.
 - Demote from Admin** — revokes administrator privileges from a user. Click **Demote**, confirm the action.
 - Delete Account** — permanently removes the user and their data from the platform. Click **Delete**, and confirm — **this action cannot be undone**.

4. Managing Trips

1. Click **Trips** in the admin navigation to open the **trip oversight table**.

The screenshot shows the TripWiz Admin Console with the 'Trip Moderation' section selected. The table lists trips with columns for Trip, Owner, Dates, Stops, Created, Status, and Actions. The table contains 10 rows of data, all with a 'Visible' status. A search bar is located at the top of the table.

TRIP	OWNER	DATES	STOPS	CREATED	STATUS	ACTIONS
Austria t-austria-1	amitbitton@gmail.com	7/2026 - 21/2026	0	7/2026	Visible	
Austria t-austria-2	amitbitton@gmail.com	1/2026 - 13/2026	0	1/2026	Visible	
Israel t-israel-1	amitbitton@gmail.com	31/2026 - 5/2026	0	31/2026	Visible	
Germany t-germany-1	amitbitton@gmail.com	1/2026 - 10/2026	6	31/2026	Visible	
Italy t-italy-1	amitbitton@gmail.com	29/2026 - 13/2026	3	29/2026	Visible	
Egypt t-egypt-1	dauidkittenberg@gmail.com	6/2026 - 16/2026	0	24/2026	Visible	
Bulgaria t-bulgaria-1	dauidkittenberg@gmail.com	2/2026 - 11/2026	2	24/2026	Visible	
Israel t-israel-2	dauidkittenberg@gmail.com	20/2026 - 27/2026	6	19/2026	Visible	
New York t-newyork-1	dauidkittenberg@gmail.com	8/2026 - 22/2026	15	19/2026	Visible	
Paris t-paris-1					Visible	

2. The table lists every trip on the platform along with its title, owner, dates, and visibility status.
3. Use the **search/filter bar** to locate a specific trip (e.g., one that was reported for inappropriate content).
4. For any trip, you can:
 - **Hide** — removes the trip from public-facing surfaces (such as trending destinations or shared previews) without deleting it. Click **Hide** on the trip's row.
 - **Delete** — permanently removes the trip from the platform. Click **Delete**, and confirm — **this action cannot be undone** and will also remove the trip for any collaborators.

5. Managing Trending Destinations

1. Click **Trending** in the admin navigation to open the **trending destinations editor**.

2. Here you curate the list of destinations shown to all travelers on their dashboard (see [07.md](#) , Section 2.4).
3. Click + **Add Destination**, enter the destination name and an image, and click **Save** to add it to the rotation.
4. Click the **edit icon** on an existing entry to update its details, or the **trash icon** to remove it from the trending list.

5. Changes take effect immediately and are visible to all travelers the next time they load their dashboard.
